

Anna Galkina

Front-end developer

Email: anna.blackbird1@gmail.com

Phone: +7(962)911-46-95

Summary

Hi, my name's Anna and I'm an experienced front-end developer (React/Redux stack) since Oct 2021. Also, I'm very interested in React Native. I'm result-oriented, well-organized and responsible team-player. Highly ambitious and extremely motivated. I'm so passionate about front-end development.

Before entry into IT, I had a huge working experience at worldwide known international companies such as Procter & Gamble and Avon. Growing from department assistance to brand manager worked in marketing including day-to-day communication with external and internal business partners in English. I developed and implemented annual brand and pricing strategies identifying product gaps and incremental opportunities for growth. Led launch and leverage of new brands and products with 360 activation with digital and field support, based on consumer insights, needs, and marketing trends.

Technical skills

- Programming Languages:** TypeScript, JavaScript (including modern approaches async/await, ES6)
- SPA libraries and frameworks:** React, basic React Native
- Store management:** Redux, Redux-toolkit, React-Redux, Redux-Thunks/Redux-Saga
- Client-Server communication:** REST API, Axios, WebSocket, Swagger, Express Node.js (basic back-end skills)
- Styles and Design:** CSS Preprocessors (SASS), CSS modules, Responsive web design, MUI, Ant Design, Figma
- Routing:** React-Router-Dom v5 and v6
- Additional libraries:** Howler.js, react-chartjs-2
- Tests:** Test Driven Development (TDD), Postman, Jest Unit Tests, Storybook, Snapshot, ReduxDev Tools
- Flow:** Git, GitHub, GitHub pages
- Linters:** ESLint, Prettier
- Containers:** Docker
- Atlassian stack:** Jira, Confluence

Projects

Learning cards

commercial project
[Learning cards Website](#)

Learning cards app with ability to create your own profile account. Easy to create own packs with cards to learn in question/answer format and monitor your study progress. Use search and filters to find packs created by other users. Participated in teamwork project Developed authentication features: registration, login, password recovery. Developed reusable components, modals. Developed menu filters and search logic. Wrote Unit Tests. Debug and fix programming bugs.

Technical stack: REST API, TS, React, Redux-toolkit, React-redux, React-router-dom v6, Axios, MUI, Formik, Jest.

To-Do List

educational project
[To-Do List Website](#)

To-Do List is an web app with ability to login and create different To-Do lists with tasks and its descriptions, edit content and track tasks status.

Technical stack: REST API, TS, React, Redux-toolkit, React-redux, React-router-dom v6, Axios, MUI, Formik, Jest.

Finance Tracker

self-educational project
[Finance Tracker Website](#)

Developed from scratch. Budget SPA that let you track expenditures and income with data saving in Local Storage. It's also give an opportunity to set goals and gradually save money to achieve the targets.

Technical stack: TS, React, Redux, React-redux, React-router-dom v6, Local Storage, React-Chartjs-2, MUI, React-Fontawesome, Jest, Uuid.

Social Network

educational project,
developed with personal
features
[Social Network Website Link](#)

SPA was developed with class container components and later refactored with functional components and hooks. Social Network for front-end developers: Login and update profile info. Follow real users. Easy to chat thanks to WebSocket connection. Listen music at music library. Read TechCrunch news and share them with one click.

Technical stack: REST API, Axios, TS, React, Redux, React-redux, React-router-dom v5, WebSocket, Antd, Formik, Howler.js, Jest, Uuid

Telegram Bot

commercial project
[Telegram Bot Link](#)

Training adviser for pole sportsmen which help them to choose exercises for different levels.

Technical stack: Javascript, Telegraf, Node-telegram-bot-api

Languages

- English:** Upper intermediate. I take private classes, constantly honing my language skills
- Russian:** Native
